

**** FOR IMMEDIATE RELEASE ****

E-Mon's Green Class Submeter Wins "Innovative Product" Award in California's 6th Annual *Flex Your Power* Competition

*Flex Your Power is the latest industry award received by E-Mon in
2008 for its innovative, market-leading submetering products*

LANGHORNE, Pa.—January 16, 2009—[E-Mon, LLC](#), the electric submetering market leader and manufacturer of the widely installed E-Mon D-Mon® product line, today announced that the company's Green Class Meter was named an "Innovative Products and Services" category winner in the State of California's 6th Annual "Flex Your Power" Awards. Initiated in 2001, Flex Your Power is California's Energy Efficiency Educational Program for highlighting and recognizing organizations, businesses, governmental agencies and other entities that have shown leadership and made exceptional contributions toward saving energy in California. The campaign's primary funding comes from the Public Goods Charge as approved by the California Public Utilities Commission (CPUC), as well as contributing munis and partner organizations and companies.

Awarded December 15, 2008 in San Francisco, category winners were chosen after careful review by a committee of leading experts from the public and private sectors. Named an "Innovative Products and Services" category winner, the E-Mon D-Mon Green Class submeter was recognized "for developing and/or widely offering new and effective products or services that promote energy efficiency and/or demand response."

In addition to California's prestigious Flex Your Power award, E-Mon's submetering products were recognized for excellence in 2008 by members of the technical trade press, including:

- Buildings Magazine—Editors' Choice Top Product—Green Class Meter
- Building Operating Management Magazine—2009 Top Product—Class 2100 Wireless Meter
- Plant Engineering Magazine—2008 Product of the Year Finalist—Class 2100 Wireless Meter
- Sustainable Facility Magazine—Top Product of 2008—Green Class Meter

"We're honored to be recognized for product excellence by so many important industry venues," said Don Millstein, president and CEO of E-Mon. "At the macro level, these awards indicate that E-Mon is doing its part to meet the demand for innovative energy monitoring products and services. Backed by almost 30 years of industry experience, E-Mon will continue to develop cost-effective hardware and software solutions in response to evolving energy monitoring and management needs of the global sustainable facility market."

About E-MON, LLC

Established in 1981, E-MON is the industry leader in solid-state electronic kilowatt-hour submeters, automatic meter reading software and other energy management products and services. Almost one half million E-Mon meters are installed worldwide for tenant billing, cost allocation, demand side management, energy conservation and load profiling in skyscrapers, shopping centers, airports, factories, office buildings, apartment buildings, college campuses and government facilities. E-Mon is an active member of the Federal Energy Management Program task force, Alliance to Save Energy, Association of Energy Engineers, U.S. Green Building Council and other leading affiliations in the energy management and conservation arena.
